ADAPT stage: Digital

How Digital is Our Neighbourhood?

Content

- 01 **Introduction**
- 02 **Tech**
- 03 **Skills and Training**
- 04 **Connectivity**
- 05 **Priorities for Action**
- 06 **Examples of Digital in Our Neighbourhood**

01. Introduction

This tool is not a magic bullet or a cure-all. It is the starting point of a conversation on how we can support people living with dementia, carers and families to benefit from using digital technology. Think of the framework as a suggested outline for a picture that will adapt and be made fuller with the lived experiences of the people who use it. Every piece of feedback adds detail to the 'picture' and in itself supports the community. It can be helpful to look at digital in terms of support for individuals to become more digitally active, neighbourhoods as a community and to look at digital access more widely using these tools and resources.

The OCN Digital Tool provides some prompts to start this conversation and an opportunity to reflect on priorities for action.

In sections 2, 3, 4, and 5, we mainly look at digital resources, skills, and local connectivity as an overview, focused on our own experience and understanding. In section 6, we apply the observations to more specific areas that mirror the categories in the Place Standard Simplified Tool you might have used during the MAP stage. More specifically, we will look at discussing local resources that simplify life in our neighbourhood or ideas to make things better.

02. Tech - hardware and software

What tech could we think about that we use or need in our homes and neighbourhoods?

- smartphones and tablets
- cameras, go-pro and drones
- home safety devices
- digital hub devices
- computers and printers
- cctv
- smart technology

Do you know where is this kit? Personal use, in libraries or hubs? Public spaces?

Do we have the right kit in the right places and can we do more to build our kit up or update it?

Sketch and Scribble

03. Skills and Training

How confident and skilled are we at digital as a neighbourhood?

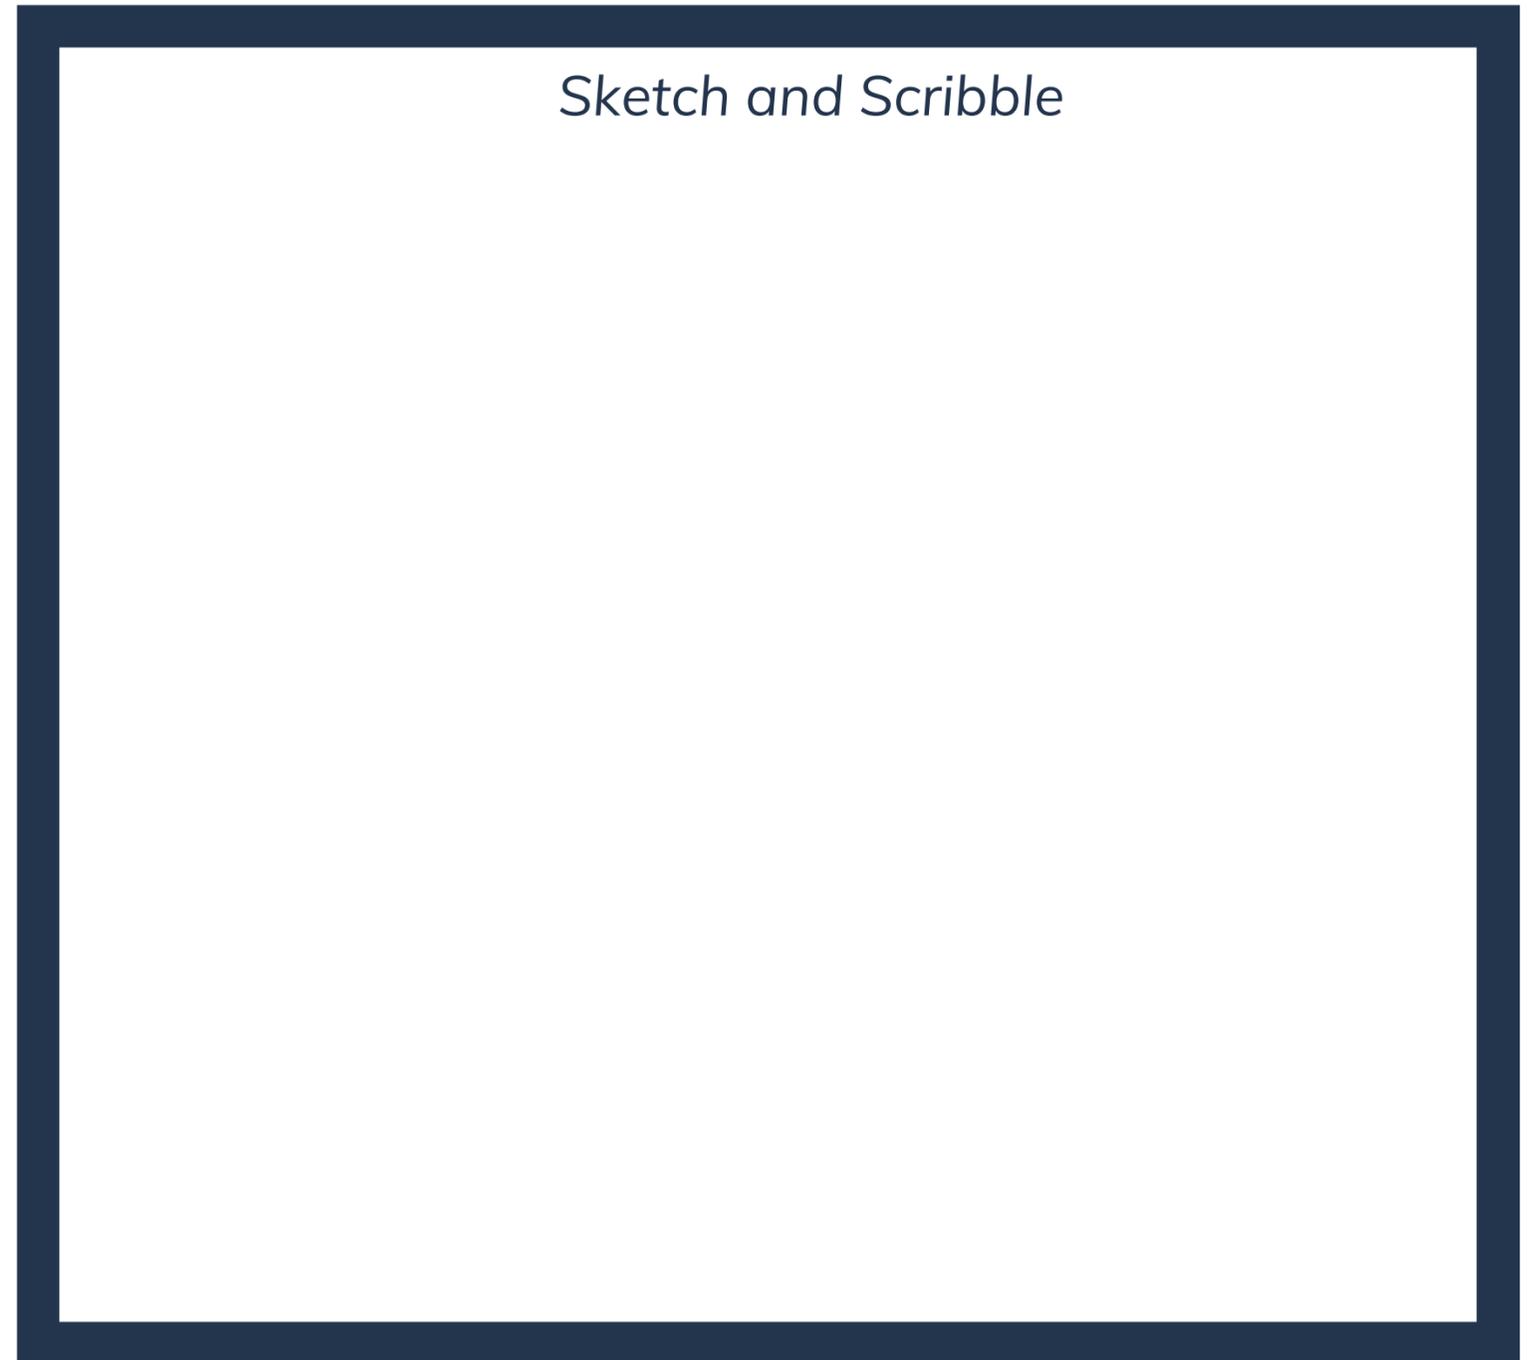

Do we have the ability and knowledge to support people living with dementia to benefit from or use digital directly?

Do we have any digital ambassadors, trainers or coaches to help?

What is our skills and knowledge gap?

Do we have good examples locally we can learn from?

Sketch and Scribble

04. Connectivity

How connected are people in our neighbourhood?

Is there good internet and broadband provision, public wifi and access to connection?

Do we have social networking for our neighbourhood?
Is this inclusive of people living with dementia?

How do we understand digital poverty in our neighbourhood and whether it is impacting on our connectivity?

Are libraries, care homes and transport hubs connected to the neighbourhood directly and regularly? What other services use digital?

Sketch and Scribble

05. Priorities for Action

Tech

Skills and Training

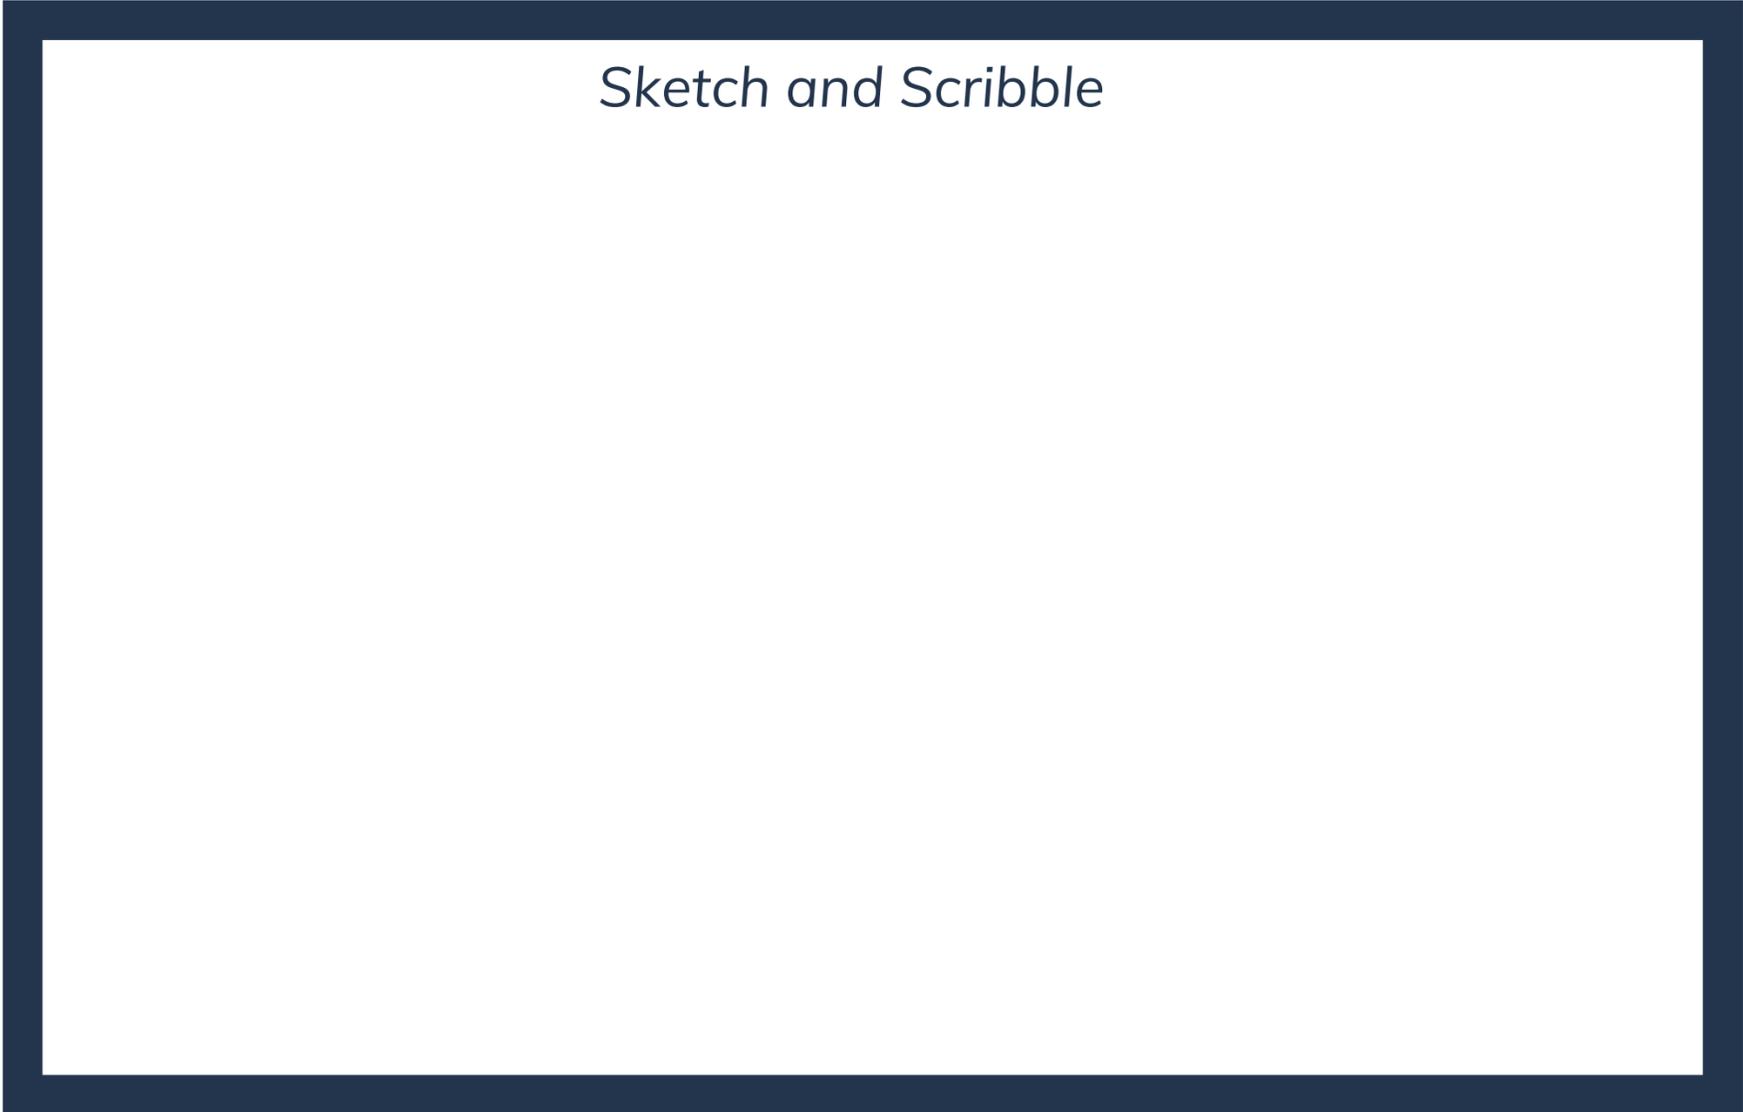

Connectivity

06. Digital in Our Neighbourhoods - examples of existing resources and ideas to improve

Outdoor spaces and how we move around

- Moving around
- Public Transport
- Traffic and Parking
- Streets and spaces
- Natural space

Sketch and Scribble

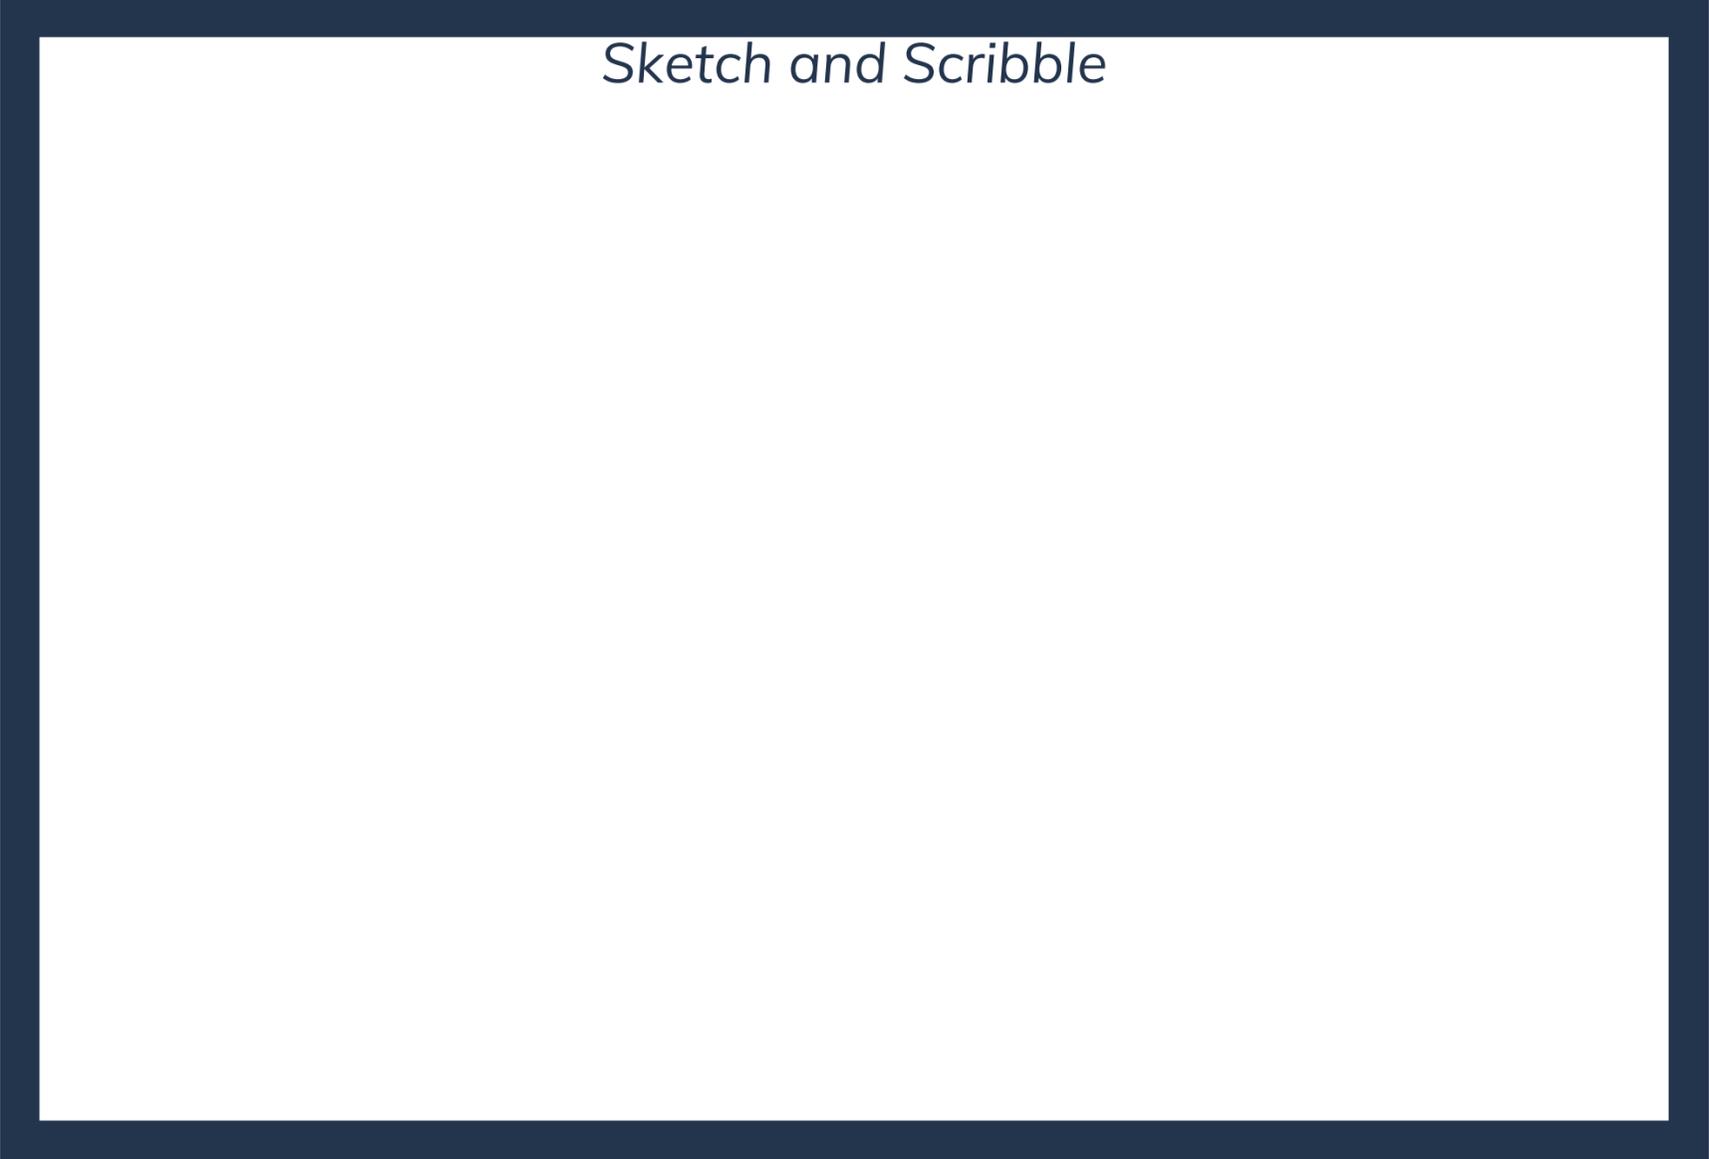

06.1 Digital in Our Neighbourhoods - examples of existing resources and ideas to improve

Buildings and Venues we spend time in

- Play and recreation
- Facilities and amenities
- Work and local economy
- Housing and community

Sketch and Scribble

06.2 Digital in Our Neighbourhoods - examples of existing resources and ideas to improve

**How we feel about our
neighbourhood and how
we connect within it?**

- Social interaction
- Identity and belonging
- Influence and sense of control
- Feeling Safe

Sketch and Scribble
